

"Given the nature of the procedure, I was understandably anxious and nervous. Dr. Harmon was a calming influence from the start. His staff and team were terrific answering all of my questions (even those you might be uncomfortable asking).

Following the procedure, I can honestly say that I did not have any pain. I remember walking out of the surgi-center shocked that the procedure was over. There was never any pain and merely some very mild discomfort for a few days. Dr. Harmon's bedside manner was as good as any doctor I have seen. I truly believe that he cared for me physically and mentally. My wife and I could not be any happier. I have referred my friends to Dr. Harmon (who have since had the procedure and have been as thrilled as I have) and I will continue to do so. The decision to have this procedure performed by Dr. Harmon was one of the best decisions I have ever made."
